Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

The source registry covers 238 sources plus 33 web guideline pages, each with a URL or file and retrieval date.

Acquisition type (source_id prefix)	Sources
web_ (web pages: Calvary, peers, comparators, funders)	156
input_ (client-provided files)	30
api_ (API pulls)	24
bulk_ (bulk downloads)	16
doc_ (government documents)	11
ref_ (reference)	1
Registry extension: web guideline pages (Phase 3 pull)	33

Publisher type	Sources	Publishers	Examples
Calvary (own documents, website, CRM export)	72	3	audits, 990 PDFs, annual reports, CRM
Funders and companies	44	23	Greater Washington Community Foundation (8)…
Core peers (annual reports, donor lists)	36	17	Community of Hope, N Street Village
Federal government	23	12	Census (7), IRS, Treasury, HUD, GSA
DC and regional government, DC CoC	23	13	DC GIS / OCTO, OCFO, Council, OVSJG, TCP
Named comparators	16	2	Downtown Women's Center (11), CBWC Empowerment…
Data intermediaries and tools	13	7	GivingTuesday Data Commons (5), NCCS (3)…
Calvary's auditors	8	3	audit firms
News and press	3	2	press releases, local news

Every row in the registry and its extension carries a URL or file path and a retrieval date (all 2026-10-10). The API catalog records 65 sources probed: 55 ok, 4 ok with no results, 3 blocked pending a key (skipped as not needed), 2 not applicable, 1 failed.

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Data quality: row counts, reconciliation results, match rates and known gaps are documented for every table. (continued, 3 of 3)

Reconciliation and match rates

- Calvary's revenue: one row per fiscal year and source FY2011–FY2025; 990-family sources agree, audits differ 0–9% by design (Appendix A, slide 2).
- FY21: audit government revenue $1,981,161 vs 990 line 1e $503,222.
- CRM: of 160 funders, 25 confirmed in window, 7 earlier only, 7 attachment-only lists, 29 with no filing rows, 92 not exempt filers.
- Unmatched recipients: 76,801 rows and $3,972,062,391 (10.0% of DC/MD/VA named-recipient dollars) lack an EIN; 'see attached' rows (667, $3,497,262,549) reported separately.
- Person matching: 48,563 people; 2,036 linked across organizations (597 high, 1,439 medium); 1,270 low-confidence pairs held back.

Known coverage gaps

- 990-N / non-filers: 660 sector orgs have no return since TY2020 in the BMF or e-file index (990-N postcard filers or inactive)…
- XML fetch: 0 of 31,483 targeted returns not retrieved.
- Paper filers: returns filed on paper have no XML; financials rely on SOI/ProPublica where present.
- Recent years: TY2024 returns are partially released (IRS 2025-2026 batches); TY2025 returns are mostly not yet filed (fiscal…
- Calvary audits for FY22, FY24, FY25 were not provided; FY22 comes from the FY23 audit's comparative column.
- FAC audit-year 2023 record for Calvary repeats FY22 SEFA amounts; FY23 audit PDF shows $937,999 (both kept, flagged).
- USAspending shows little of the DC pass-through money (SLFRF, CoC via TCP, EFSP); FAC and DC sources cover it.
- DHS provider-level grant lists for 2025-2026 were not posted (Excel attachments missing); TCP Schedule I is the fallback.
- Corporate giving (non-foundation) appears only where Calvary or a peer lists it (no public filing).
- Individual donors are deliberately excluded except as counts per gift band (Calvary donor privacy policy).

data as of 2026-10-10 · method note D3

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note A1: government share uses the audit basis through FY23 and 990 line 1e for FY24–25, which matched the audits in FY22–23.

Question: how large is government money in Calvary's revenue, and how reliable is each measure?

- Revenue, expenses, net assets and cash come from fact_org_financials preferred 990 rows, one per fiscal year; five sources agree within 1%.
- Government revenue: audit basis (contracts and grants) FY13–FY23; 990 Part VIII line 1e FY24–FY25.
- Line 1e misses contracts booked as program revenue: the FY21 audit shows $1,981,161 against $503,222 on line 1e.
- Private contributions ex-events = contributions total − government − line 1c events; institutional giving is measured from funders' filings instead (A3).
- Real values: CPI-U annual average, base 2024, by the calendar year in which the fiscal year ends.
- Peers: line 1e ÷ total revenue on preferred rows, FY2015–FY2025.

Caveats

- No FY24 or FY25 audits are public; those years rest on the 990.
- The 990 cannot split individuals from foundations in private contributions.
- Months of cash is comparable from FY2020.

Confidence

- High on revenue, margin, liquidity and government share through FY23; medium on the FY24–25 government share (990 only).

Source: calvary_analysis/reports/methodology.md §5 A1; modules/m1_calvary_trajectory.md; no config file (preferred-row ranking set in the data build)
Method: share = government revenue ÷ total revenue on the stated basis
Chart m1_01–m1_06 · data as of 2026-10-10 · method note A1

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note A2: each government stream uses one source, never summed, with DC fiscal years as Calvary's and CoC years lagged one.

Question: which government streams fund Calvary, and how big is each?

- OVSJG: award lists, DC FY2019–2026.
- HUD CoC via TCP: award lists, competition years 2019–FY2025; each project is stored once as a subaward with TCP as pass-through.
- DHS provider contracts via TCP: Council oversight responses, DC FY2024 only.
- Small federal pass-throughs (EFSP, SNAP E&T): audited SEFA lines.
- One-time money listed separately: SLFRF $3.68M, PPP $327K, HUD CPF $200K.
- Calendars: DC FY = Calvary FY; CoC competition year t → Calvary operating year t+1; SEFA = expenditure in the audited year; the FAC 'audit year 2023' record duplicates FY22, so the FY23 audit PDF ($937,999) is used.
- Stream durability (annual, renewal, at-risk) is an analyst rating.

Caveats

- DHS/TCP amounts are public for FY2024 only; other years are unknown, not zero.
- The one-year CoC lag is an assumption set in config.
- Federal policy risk (2025 CoC NOFO, EHV sunset) is only partly in the data.

Confidence

- High on the stream map, pool shares and DC budget lines; durability ratings are judgment.

Source: calvary_analysis/reports/methodology.md §5 A2; modules/m2_government_exposure.md; config/scenarios.yaml (coc_award_lag_years)
Method: one source_type per stream from fact_gov_awards
Chart m2_01, m2_01b, m2_03, m2_05 · data as of 2026-10-10 · method note A2

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note A3: filed grants to Calvary come from funders' own filings for TY2020–24, exclude cumulative rows and aggregate by funder EIN.

Question: which institutions fund Calvary, and how concentrated is that base?

- fact_grants 990-PF and Schedule I rows naming Calvary, TY2020–24, non-cumulative, aggregated by funder EIN.
- The base is 138 rows from 50 funders, $4.43M.
- Concentration = each funder's share of five-year filed grants plus a Herfindahl index (1,168).
- GWCF is the largest filed funder at $1,206,500 under two raw spellings on one EIN; the Health Equity Fund is attributed to GWCF as funder of record.
- CRM export: 160 funders, $10.56M, treated as cumulative over an unconfirmed 2023–26 window (assumption A1) and as cash unless contradicted (A2); checked against each funder's filings and never added to filed annual grants.

Caveats

- Funder tax years do not align with Calvary's fiscal year.
- TY2024 filings are partial and TY2025 mostly unfiled, so 'flat' after TY2023 is partly filing lag.
- The CRM covers institutional gifts only.

Confidence

- High on the concentration of filed grants.

Source: calvary_analysis/reports/methodology.md §5 A3; modules/m1_calvary_trajectory.md; calvary_funding_data/config/funder_match_overrides.csv
Method: funder share = funder total ÷ $4.43M; HHI on shares
Chart m1_07, m1_08 · data as of 2026-10-10 · method note A3

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note A4: scenarios split FY25 government revenue by ceiling share and apply configured cuts, and the net view treats half as avoidable cost.

Question: what happens to revenue, deficit and cash if government streams are cut?

- Baseline: FY25 recognized government revenue ($2.89M) apportioned by ceiling share: OVSJG 23%, CoC 41%, DHS 33%, other 2%.
- Each scenario applies its cuts to those stream amounts; gross = the revenue loss; net assumes 50% of a lost stream's revenue is avoidable program cost.
- Outputs: revenue loss, deficit, months of cash after a year and months until cash runs out.
- Parameters: baseline_fiscal_year 2025; cost_avoidance_share 0.5; dhs_assumed_flat_from_fy2024 true; coc_award_lag_years 1.
- S1 OVSJG −10%; S2 OVSJG −25%; S3 CoC −15%; S4 New Foundations 2 lost; S5 DHS/TCP not renewed; S6 combined. Levels set by the CP1 ruling.

Caveats

- Stream shares come from award ceilings, not Calvary's ledger.
- The DHS value is the FY2024 figure carried forward.
- Cost avoidance of 50% is an assumption.

Confidence

- Medium: apportionment and carry-forward assumptions drive the stream amounts.

Source: calvary_analysis/reports/methodology.md §5 A4; modules/m2_government_exposure.md; config/scenarios.yaml
Method: scenario arithmetic in scripts/02_m2_exposure.py
Chart m2_07 · data as of 2026-10-10 · method note A4

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note A5: award ceilings are aligned to Calvary's fiscal year and compared with recognized revenue, not substituted for it.

Question: does Calvary recognize the government money it is awarded?

- Ceilings come from the A2 sources, aligned to Calvary's fiscal year: DC FY = Calvary FY, CoC lagged one year, DHS FY2024 carried forward.
- They are compared with recognized government revenue (990 line 1e for FY24–25) in m2_02.
- Result, discovery flag D1: FY24 ceilings $3.6M vs $2.62M recognized; FY25 $4.3M vs $2.89M.
- Approved at CP2 as a medium-confidence finding labeled 'ceilings vs recognized'.
- Possible explanations: undrawn awards, timing, cost-reimbursement limits or an overstated DHS carry-forward; the data cannot distinguish them.

Caveats

- DHS values before FY2024 are unknown, so earlier ceilings are understated.
- EFSP and SNAP E&T are held at the audited FY23 level.

Confidence

- Medium. The FY24 and FY25 audits and TCP subgrant agreements would resolve it.

Source: calvary_analysis/reports/methodology.md §5 A5; modules/m2_government_exposure.md; config/scenarios.yaml (dhs_assumed_flat_from_fy2024, coc_award_lag_years)
Method: ratio = recognized government revenue ex SLFRF ÷ known ceilings
Chart m2_02 · data as of 2026-10-10 · method note A5

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note A6: DC budget lines are activity-level totals from the budget books, and policy events add Council reports and Budget Support Acts.

Question: are the DC pools Calvary draws on growing or shrinking, and when are they cut?

- supp_dc_budget_lines (5,172 rows): activity-level totals from the DC Approved Budget and Financial Plan books FY2024–FY2027, approved vs actual vs Mayor's proposal; each book carries two years of actuals and two approved years.
- fact_policy_events (297 rows): dated changes from the budget books, Council committee budget reports, Council Budget Office change charts and the Budget Support Acts FY2024–FY2027.
- Committee recommendations the Council did not enact stay as budget_proposed.
- Budget tables tie to printed totals (257 of 257).
- Lines tracked: OVSJG Victim Services grants, the DHS homeless-services continuum and local PSH, alongside DCHA, DBH, DHCD and DOES.

Caveats

- The Mayor's proposals are as reported by Council committees.
- Actual spending is available only for years with a later book.

Confidence

- High on the DC budget lines.

Source: calvary_analysis/reports/methodology.md §5 A6; modules/m2_government_exposure.md; no config file
Method: sums of activity-level 'total' rows per program code
Chart m2_04, m2_05, m2_06 · data as of 2026-10-10 · method note A6

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note B1: peer metrics use preferred 990 rows, FY2022–24 government-share means and FY2019–24 real growth that skips the FY22 award.

Question: how does Calvary compare with its peers on mix, size, growth and liquidity?

- Preferred 990 rows FY2015–FY2025 for Calvary, the 18 provisional peers and the two named comparators.
- Government share: line 1e ÷ total revenue (Calvary FY≤2023 on the audit basis); FY2022–24 means smooth reporting breaks such as Coalition for the Homeless FY23 and Samaritan Inns FY24.
- Real growth: CAGR of 2024-dollar revenue FY2019 → FY2024.
- Months of cash: cash and savings ÷ monthly expenses.
- Typology on the three-year mean: government-anchored ≥65%, mixed 35–65%, philanthropy-led <35%.
- Sector distributions: dc_sector FY2023 (n=163), size_matched FY2022 (n=334), national_women FY2022 (n=542), chosen for filing coverage.

Caveats

- Core peers are provisional.
- Line 1e understates government where contracts are booked as program revenue (possibly Samaritan Inns FY24–25).

Confidence

- High for shares, growth, liquidity and sector percentiles; medium for the typology of diversifiers.

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note B2: the funder base counts filed grants naming each organization, separates DAF sponsors and measures depth per revenue dollar.

Question: how deep is each organization's institutional funder base?

- Funder base: 990-PF and Schedule I rows naming each organization, TY2020–24, non-cumulative.
- Split: institutional vs DAF via dim_funder.funder_type (Fidelity, Schwab, Benevity/AOGF, NPT, Vanguard and others are DAF sponsors).
- Measures: institutional-funder count, DAF share of filed grants, and depth = institutional dollars ÷ FY2020–24 revenue.
- Diversifier case studies use line-1e mix trajectories (m3_08).

Caveats

- Only DMV funders' filings are present, so the LA comparators' local funders are not captured.
- TY2024 filings are partial.

Confidence

- Medium for funder-base depth.

Source: calvary_analysis/reports/methodology.md §5 B2; modules/m3_peer_benchmarking.md; calvary_funding_data/config/core_peers.csv
Method: depth = institutional $ ÷ revenue
Chart m3_00, m3_06 · data as of 2026-10-10 · method note B2

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note B3: comparator profiles combine 990 trajectories, single-audit federal programs and web funder evidence, and each closes with what transfers to Calvary.

Question: what can Calvary learn from DWC and SheWorks?

- Financials: trajectory, mix and months of cash from preferred 990 rows (line 1e for government).
- DWC federal programs: FAC single-audit SEFA FY2020–25.
- Funder evidence: DWC donor lists and gala pages (2023, 2025), funders' press releases and announced grants, and DMV funders' filings.
- SheWorks: program evidence from the parent's and partners' web pages.
- Both appear as Los Angeles reference rows on every peer table and chart.

Caveats

- DWC's fiscal year is the calendar year.
- Line 1e is the only government measure for both.
- LA-area funders are partly captured (no amounts on web lists).
- The CBWC Institute has three filings; SheWorks launched after the last one.

Confidence

- High on DWC's trajectory and federal programs; medium on funder lists and the SheWorks parent.

Source: calvary_analysis/reports/methodology.md §5 B3; modules/m10_comparator_profiles.md; calvary_funding_data/config/named_comparators.csv

Chart m10_01–m10_05 · data as of 2026-10-10 · method note B3

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note C1: the landscape uses two lenses on filed grants with two exclusions, and five gap categories test whether an absence is current.

Question: who funds Calvary's space, and which of those funders do not yet fund Calvary?

- Base: filed grants TY2020–24, non-cumulative; exclusions: Gates Foundation (global and research recipients) and TCP (public pass-through).
- Lens A: grants to the 1,027 dc_sector organizations. Lens B: grants to DC/MD/VA recipients whose purpose is tagged housing, DV or women.
- DAF sponsors are reported separately from institutional funders.
- 'Funds Calvary' = any filed grant naming Calvary TY2020–24; 'itemized TY2023+' = the funder filed itemized lists recently, so a missing Calvary grant is current.
- G1 peer funders (≥2 peers); G2 lapsed (last grant ≤TY2022); G3 headroom (larger grant to a peer); G4 DC-sector majors (≥$500K); G5 peer donor lists only; plus the CRM reconciliation.

Caveats

- 'See attached' filers (667 rows, about $3.5B) have no recipient names.
- Corporate giving without a foundation is invisible in filings.
- A filing gap may be a DAF-routed gift or a corporate match.

Confidence

- High on totals, concentration and filing-based gaps; medium on purpose tags and headroom.

Source: calvary_analysis/reports/methodology.md §5 C1; modules/m4_funder_landscape.md, modules/m5_funder_gaps.md; config/landscape_exclusions.csv
Method: scripts/04_m4_landscape.py and 05_m5_gaps.py
Chart m4_00–m4_08, m5_00–m5_06 · data as of 2026-10-10 · method note C1

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note C2: the network is a funder-by-recipient graph of filed grants, with rated interlocks and a 0–1 path score.

Question: which funders sit closest to Calvary's network, and are there board links to them?

- Graph: bipartite, funders × 19 recipients (Calvary + 18 provisional peers); edges = filed grants TY2020–24 with exclusions; degree = organizations funded; betweenness on the unweighted graph.
- Overlap per peer: shared institutional funders (DAF sponsors excluded), Jaccard similarity, and the peer's institutional funders that do not fund Calvary.
- Interlocks: shared_board_member links touching Calvary, a peer or a comparator; person records linked only on an exact normalized name plus a corroborating signal; outputs store person_id only, never names.
- CP1 ruling: leadership materials use high-confidence links only; medium links are labeled unconfirmed.
- Path strength = 0.40 × peers funded (cap 12) + 0.25 × close peers (cap 8) + 0.25 × overlapping co-funders (cap 20) + 0.10 × any high-confidence board link; consulting variant +0.05 for a medium link.

Caveats

- Corporate and DAF-routed individual gifts are only partly visible.
- A medium-confidence match may be two different people.

Confidence

- High on the graph and overlap counts; medium on the path-strength construct.

Source: calvary_analysis/reports/methodology.md §5 C2; modules/m6_network.md; config/landscape_exclusions.csv (path weights documented in the m6_05 manifest note)
Method: scripts/06_m6_network.py
Chart m6_01–m6_05 · data as of 2026-10-10 · method note C2

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note C3: the pipeline scores candidates on seven weights from one config file and adds analyst-scored government and corporate rows.

Question: which funders should Calvary pursue first?

- Candidates: the M5 gap and current-funder base joined to M6 paths and the M4 landscape; DAF sponsors excluded; the T. Rowe Price Program scored like a DAF.
- Weights: mission fit 0.20, peer giving 0.20, regional giving 0.10, award size 0.15, accessibility 0.10, durability 0.10, relationship 0.15.
- Tiers: Tier 1 score ≥ 0.62 and median peer grant ≥ $25,000 (max 20); Tier 2 ≥ 0.48; Tier 3 the rest.
- Analyst-scored rows: five government rows (OVSJG 0.80, HUD CoC 0.78, DHS 0.72, DHS PSH 0.55, HUD CPF 0.45) and corporate CRM relationships ≥ $50K; Grants.gov notices default to Tier 3.
- Web pull: 32 Tier 1–2 funders searched, 128 hits, hand-reviewed into 27 guideline notes (13 first-party, 7 third-party, 7 analyst notes).
- Sensitivity: each weight ±0.05 (renormalized) and each tier cutoff ±0.05.

Caveats

- Scores rank evidence, not fit with funder guidelines.
- Government and corporate scores are judgment.
- In-kind channels are penalized, not removed.

Confidence

- Medium: the ordering is robust to moderate weight changes; exact ranks are not.

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note D1: the expansion scan measures tagged DMV grant dollars, funders and federal notices per area and rates each area's distance.

Question: which adjacent program areas would open new funding pools, and how far are they from what Calvary runs today?

- For each tag in dim_program_area: DMV institutional grant dollars TY2020–24 whose purpose text carries the tag (DAF sponsors and exclusions removed).
- Funders active, funders at $100K+, median grant, DC policy events, and peer and comparator examples.
- Federal Grants.gov notices after dropping research, tribal, rural and overseas notices and keeping HUD, VA, DOL, DOJ, ACF, SAMHSA, USDA, Treasury and ACL.
- Distance: core; near = already delivered in some form; medium = same clients, new capability or credential; far = new population or licensing.
- Ratings: housing core; DV, behavioral health, workforce and education near; physical health, aging, women veterans and reentry medium; maternal and family health far.

Caveats

- Tagged dollars understate what funders would give (general operating excluded).
- Distance ratings are judgment.
- Federal notices are a snapshot.

Confidence

- Medium.

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note D2: universes are rule-built from IRS master files, and the 18 provisional peers change with one config edit.

Question: who is Calvary compared with, and how robust is that choice?

- Universes are built from the IRS EO BMF and e-file index with rules in config/universes.yaml (sizes on the universes slide).
- Peer candidates: 36 named DC-area seeds plus a sweep of DC/DMV sector charities with revenue ≥ $750K and a shelter/DV NTEE code or a women-focused name.
- Score: women focus 3, DV 2, homeless/housing 2, recovery or mental health 1, Ward 7/8 2, DC 1, size similarity up to 2; homeless or DV language must appear in the filing text.
- The 18 peers have not been formally reviewed and are labeled provisional in every output; thirteen alternates are listed in the proposal.
- Swap: edit core_peers.csv, rerun 20_build_universes.py, then the analysis scripts from 03 onward.
- Peer-dependent outputs that move with the set: B1–B2 benchmarks, gap categories G1 and G3, the network and path strength, and pipeline peer-giving and relationship scores.

Caveats

- Benchmark years differ by universe (dc_sector FY2023; national universes FY2022) because filing coverage collapses afterwards.

Confidence

- Provisional by design; sector percentiles are reported alongside peer ranks.

Source: calvary_analysis/reports/methodology.md §5 D2; modules/m3_peer_benchmarking.md; calvary_funding_data/reports/core_peers_proposal.md; calvary_funding_data/config/core_peers.csv, config/universes.yaml

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note D3: the main limitations are known and bounded, and six documents from Calvary would close the largest of them.

Documents requested from Calvary

- FY24 and FY25 audits, including any single audits: closes the audit-basis government share for FY24–25 and flag D1.
- TCP subgrant agreements FY2023–FY2026: closes the DHS/TCP stream (public for one year only) and flags D1 and D2.
- CRM export definitions: window, gift-date basis and the in-kind share of the largest corporate relationships (assumptions A1 and A2).
- Sisters Rise / EHV status in FY25: closes flag D2.
- FY25 gala timing: closes flag D3.
- SheWorks program-level budget and funders.

Discovery flags (all approved as proposed at CP2)

- D1: recognized 67–73% of known award ceilings in FY24–FY25; medium confidence, labeled 'ceilings vs recognized'.
- D2: Sisters Rise absent from the 2025 HIC; DHS stream rated 'at risk', FY2024 value kept in the baseline.
- D3: event contributions $538K → $55K while net event income turned positive; reported as the largest single swing.
- The full limitation list (29 items, each with its mitigation) follows.

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

Method note D3: each of the 29 limitations carries the mitigation used in the analysis.

#	Limitation	Mitigation used
1	No FY24/FY25 audits are public; those years rest on the 990	Line 1e used for FY24–25 because it matched audits exactly in FY22–23; audits requested from Calvary (D3)
2	990 line 1e understates government money where contracts are booked as program revenue (Calvary FY21; possibly Samaritan Inns FY24–25…	Calvary on the audit basis through FY23; both measures shown; three-year means for peers; reporting breaks flagged
3	DHS/TCP amounts are public for FY2024 only; other years are unknown, not zero	FY2024 carried forward as a config assumption; stream rated "at risk"; TCP agreements requested
4	HUD CoC amounts are competition years; the one-year lag to Calvary's operating year is an assumption	Lag set in scenarios.yaml and named in footnotes
5	Scenario stream shares are apportioned from award ceilings, not from Calvary's ledger	Shares published in m2_07_scenario_parameters; ceilings vs recognized gap reported as flag D1 at medium confidence
6	Federal policy risk (2025 CoC NOFO, EHV sunset) is only partly in the data	Treated as external context in durability ratings, not modeled
7	Government award sources overlap (awards, payments, SEFA)	One source per stream, never summed across source_type
8	Funder tax years don't align with Calvary's fiscal year; TY2024 is partial and TY2025 mostly unfiled, so "flat" after TY2023 is partly…	TY2020–23 as the trend window, TY2024 labeled "arriving", TY2025 excluded; "itemized TY2023+" test in M5
9	The 990 cannot split individuals from foundations in private contributions	Institutional giving measured from funders' own filings instead
10	CRM export is cumulative over an unconfirmed window, institutional only, cash vs in-kind unknown	cumulative_flag=1, never added to annual rows; each funder checked against its filings (supp_crm_cash_verification); questions sent to…

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

The discoveries log records every flag and its resolution: three flags, all approved as proposed at CP2.

#	Finding	Why it matters	Proposed action	Response
D1	Calvary recognized only ~67-73% of its known government award ceilings as revenue in FY24-FY25 (ceilings $3.6M / $4.3M vs 990 line 1e $2.62M / $2.89M). Line 1e matched the audited figure exactly in FY22-23, so the 990 number is credible.	$0.9-1.4M/yr of awarded money may be undrawn (utilization, timing, cost-reimbursement limits) or the DHS carry-forward overstates FY25. Undrawn awards are the cheapest revenue to recover and change the verdict from "needs new money" to "needs new money and…	Keep the finding at medium confidence, label it "ceilings vs recognized", and put "FY24/FY25 audits and TCP subgrant agreements" at the top of the questions for Calvary. No scope change.	approved as proposed (CP2, 2026-10-10)
D2	Sisters Rise (24-unit PSH paired with Emergency Housing Vouchers; $593K DHS/TCP contract in FY2024) is absent from the 2025 Housing Inventory Count.	If the EHV program ended in FY25, part of the FY25 revenue drop is already a lost government stream, and the scenario baseline should exclude it.	Treat the DHS stream as "at risk" in M2 durability; ask Calvary; keep the FY2024 value in the baseline until confirmed.	approved as proposed (CP2, 2026-10-10)
D3	Event contributions fell from $538K (FY24) to $55K (FY25) while net special-event income turned positive (+$219K).	Explains most of the $0.8M FY25 contribution drop; it is a reporting or scheduling change (gala moved or re-booked) rather than donor flight, which changes the private-revenue story.	Report it as the largest single swing; ask Calvary whether the FY25 gala moved across the fiscal-year line.	approved as proposed (CP2, 2026-10-10)

Calvary Women's Services
Ending homelessness. Inspiring hope. Transforming lives.

How to rerun: scripts, requirements, config files and the trace test reproduce every figure from the clean tables. (what to edit)

To change	Edit	Then rerun
Core peers	calvary_funding_data/config/core_peers.csv	calvary_funding_data/scripts/20_build_universes.py, then analysis 03–07, 12, 13
Scenarios	calvary_analysis/config/scenarios.yaml	02
Scoring weights or tiers	calvary_analysis/config/scoring_weights.yaml	07, 12, 13
Landscape exclusions	calvary_analysis/config/landscape_exclusions.csv	04–07, 12, 13
Expansion areas or distances	calvary_analysis/config/expansion_areas.yaml	08
Guideline notes	calvary_analysis/config/guideline_notes.csv	12

Environment and trace test

- Python 3.12 in calvary_funding_data/.venv; analysis packages pinned in calvary_analysis/requirements.txt (pandas, matplotlib, networkx, python-pptx, pyyaml, shapely, markitdown, tavily-python).
- Scripts read only calvary_funding_data/clean/ (and raw/geo for the ward map) and resolve paths from their own location.
- scripts/lib/trace.py checks chart ID → chart_data CSV → clean table → source registry and prints TRACE OK or the problems.

Source: calvary_analysis/reports/methodology.md §7; calvary_funding_data/README.md (Rebuild)
Method: each script appends to analysis_log.md and rewrites its chart data, manifest rows and insight rows
